

Alishba Nazem

Software Engineering Student | Full Stack Developer & AI Automation

Pakistan | +92 3177630756 | alishbanazem@gmail.com | [LinkedIn](#)

PROFILE

Motivated Software Engineering student with a strong academic background and a keen interest in web development and system design. Eager to gain practical experience, improve problem-solving abilities, and grow in a professional software development environment.

HIGHLIGHTED SKILLS

Web Development: HTML5, CSS, JavaScript, React, ASP.NET Core/.NET Framework, C#

AI Automation: AI Agent Development (n8n + Custom Code), Groq API / LLM Integration, Serverless Functions (Vercel), Automated Content Workflows

Backend: Node.js, Express.js, MongoDB (MERN Stack)

Programming Languages: C++, Java

Databases: MySQL, SQL Server

Documentation & Design: Requirement Elicitation, SRS Documentation, UML Modeling

Tools & Integration: n8n (Automation), Git/GitHub, Visual Studio, Android Studio, Cursor, Vercel **Languages:** English, Urdu

Experience AI Automation Intern | Dafi Labs | July 2026 - Present

- Building an AI agent using n8n combined with custom code to automate social media content generation.
- Designing automated workflows that take content from generation through to publishing-ready output.

FullStack Developer Intern | ScaleUp Brands | July 2026 - Present

- Built full-stack features (React 18 + TypeScript, Node.js + Express 5) for a UK-based brand
- Designed data models with Prisma + Supabase Postgres; used BullMQ + Redis for job queues
- Integrated Supabase Realtime for live UI updates; shipped code to GitHub in sprint-based workflow

Frontend AI Intern | FlyRank AI | July 2026 - present

- Contributing to frontend and AI-integrated features as part of an ongoing internship track.
- Gaining hands-on exposure to AI-assisted product development alongside core React work.

Frontend Developer Intern | DecodeLabs | June 2026 – July 2026

- Delivered React-based frontend work independently
 - Practiced end-to-end feature ownership, from UI implementation to deployment.
-

Projects InboxPilot AI

- Built a React application with an AI-powered chat/inbox feature, using a Vercel serverless function to securely proxy calls to the Groq API (llama-3.3-70b-versatile), avoiding CORS issues and exposed keys.
- Built solo during 5 day ai agentic vibe coding competition by Google and Kaggle

Habit Builder Tracker

- Built a cross-platform habit-tracking app to help users build and maintain daily habits.

LinkedIn Trend & Auto-Posting AI Agent

- Built an AI-powered LinkedIn automation workflow using n8n, Gemini, and LinkedIn API.
- Automated trend discovery, post generation, approval, and publishing.
- Integrated OAuth 2.0 and scheduled workflows for seamless content management.

Ecommerce Competitor Tracker

- Built an **AI-powered e-commerce competitor tracker** to monitor competitor products, prices, and customer reviews.
- Automated **daily/weekly data capture** and price/product change tracking.
- Used AI to analyze **customer feedback, likes/dislikes, and market gaps** to identify potential product opportunities.
- Designed a dashboard for **competitor monitoring and actionable market insights**.

Achievements

1. 1st Runner-Up - IdeaRise Startup Challenge 2026 | ChemMentoria STEM Platform

Selected among Top 5 Finalist Ideas and got 2nd position

2. District Topper | Matriculation Examination

Achieved **1100/1100 marks**, securing the highest score in the district.

EDUCATION Bachelor in Software Engineering (2023-2027) | Ongoing

University of Gujrat, Pakistan

CGPA: 3.78/4.0 (6 semester done)

CERTIFICATIONS

Google Project Management Professional Certificate (Coursera)

Google UX Design Professional Certificate (Coursera)

Google × Kaggle 5-Day AI Agents Intensive Vibe Coding Course
